

1. IDENTIFICATION

Product identifier**LAWN BUILDER EXTREME GREEN LAWN FOOD****Company name**

Evergreen Garden Care Australia Pty Ltd

Address

24-32 Lexington Drive, Bella Vista NSW AUSTRALIA

Phone/Fax number

Tel: 02 8602 9000

Fax: 02 8602 9001

Emergency Phone Number

1800 033 111

Recommended use of the chemical and restrictions in use

Lawn fertiliser

2. HAZARD IDENTIFICATION

GHS classification of the substance/mixture

Not classified as hazardous according to the Globally Harmonised System of Classification and Labelling of Chemicals (GHS) including Work, Health and Safety Regulations, Australia.

Not classified as dangerous goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail (7th Edition).

Poisons classification: Not a scheduled poison.

3. COMPOSITION

Ingredient	CAS number	Concentration
Non-hazardous components	-	100%

4. FIRST AID MEASURES

Inhalation

Remove affected person from contaminated area. If symptoms develop and/or persist seek medical attention.

Ingestion

Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person.

Skin contact

Quickly and gently brush away excess particles. Wash gently and thoroughly with water. If symptoms develop, seek medical attention.

Eye contact

Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs.

First aid facilities

Eyewash and normal washroom facilities.

Advice to doctor

Treat symptomatically. Contact poisons treatment specialist immediately if large quantities have been ingested or inhaled.

Other information

For advice in an emergency, contact a Poisons Information Centre (Phone Australia 13 11 26) or a doctor immediately.

5. FIRE FIGHTING MEASURES

Suitable extinguishing media

Not combustible. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Hazards from combustion products

The major hazard in fires is usually inhalation of heated and toxic or oxygen deficient (or both), fire gases. There is no risk of an explosion from this product under normal circumstances if it is involved in a fire.

Fire decomposition products from this product may be toxic if inhaled. Take appropriate protective measures.

Specific fire-fighting instructions

Fire fighter should wear self-contained breathing apparatus (SCBA) operated in positive pressure mode and full protective clothing to prevent exposure to vapours or fumes. Water spray may be used to cool down heat exposed containers. Fight fire from a safe location. This product should be prevented from entering drains and watercourses.

6. ACCIDENTIAL RELEASE MEASURES

Emergency procedures

Minor spills do not normally need any special cleanup measures. In the event of a major spill, prevent spillage from entering drains or water courses. Wear full protective chemically resistant clothing including eye/face protection, gauntlets and self-contained breathing apparatus. See below under Personal Protection regarding Australian Standards relating to personal protective equipment. Suitable materials for protective clothing include cotton, rubber, PVC, Nitrile. Eye/face protective equipment should comprise, as a minimum, protective glasses and, preferably, goggles. If there is a significant chance that dusts are likely to build up in cleanup area, use of a suitable dust mask is recommended.

Stop leak if safe to do so, and contain spill. Sweep up and shovel or collect recoverable product into labelled containers for recycling or salvage, and dispose of promptly. Consider vacuuming if appropriate. Recycle containers wherever possible after careful cleaning. After spills, wash area preventing runoff from entering drains. If a significant quantity of material enters drains, advise emergency services. This material may be

suitable for approved landfill. Ensure legality of disposal by consulting regulations prior to disposal. Thoroughly launder protective clothing before storage or re-use. Advise laundry of nature of contamination when sending contaminated clothing to laundry.

7. HANDLING & STORAGE

Precautions for safe handling

Avoid inhalation of dust and skin or eye contact. Keep exposure to this product to a minimum, and minimise the quantities kept in work areas. Check Section 8 of this SDS for details of personal protective measures, and make sure that those measures are followed. The measures detailed below under "Storage" should be followed during handling in order to minimise risks to persons using the product in the workplace. Also, avoid contact or contamination of product with incompatible materials listed in Section 10.

Conditions for safe storage, including incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

The following Australian Standards will provide general advice regarding safety clothing and equipment: Respiratory equipment: **AS/NZS 1715**, Protective Gloves: **AS 2161**, Occupational Protective Clothing: **AS/NZS 4501 set 2008**, Industrial Eye Protection: **AS1336** and **AS/NZS 1337**, Occupational Protective Footwear: **AS/NZS2210**.

Exposure limits

No specific exposure standards are available for this product.

Biological limits

None allocated.

Engineering measures

Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Personal protective equipment

Respiratory: If there is a significant chance that dusts are likely to build up in the area where this product is being used, a suitable dust mask is recommended.

Eye/face protection: Protective glasses with side shields, goggles or full face shield should be worn when this product is being used. Emergency eye wash facilities must also be available in an area close to where this product is being used.

Skin/body protection: Prevent skin contact by wearing impervious gloves, clothes and, preferably, apron. Make sure that all skin areas are covered. See below for suitable material types.

Work hygiene practices: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the toilet and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state	Tan, white, black blend of granules
Odour	May have a distinctive odour.
Colour	Tan, white, black
pH	No data available
Vapour pressure	No data available
Relative vapour density	No data available
Boiling point	No data available
Melting point	No data available
Freezing point	No data available
Solubility	No data available
Specific gravity	No data available
Flash point	No data available
Bulk density	No data available

10. STABILITY AND REACTIVITY

Reactivity

This product is unlikely to react or decompose under normal storage conditions.

Chemical stability

The product is stable.

Hazardous reactions

Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid

No specific data.

Materials to avoid

Strong oxidising agents.

Hazardous decomposition products

Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Under fire conditions, the product may emit toxic and/or irritating fumes, smoke and gases including carbon monoxide, carbon dioxide and oxides of nitrogen.

Polymerisation

This product will not undergo polymerisation by reaction.

11. TOXICOLOGICAL INFORMATION

Toxicological data is not available for the substance.

Acute toxicity: Significant oral exposure is considered to be unlikely. Available data shows that this product is not harmful. However, this product may cause nausea and vomiting.

Skin corrosion/irritation: May cause abrasive irritation in contact with the skin which can result in redness, itching and possible dermatitis.

Eye damage/irritation: Eye contact may cause mechanical irritation and mild abrasion.

Respiratory/skin sensitisation: No known significant effects or critical hazards.

Germ cell mutagenicity: No known significant effects or critical hazards.

Carcinogenicity: No known significant effects or critical hazards.

Reproductive toxicity: No known significant effects or critical hazards.

STOT (single exposure): No known significant effects or critical hazards.

STOT (repeated exposure): No known significant effects or critical hazards.

Aspiration toxicity: No information available.

12. ECOLOGICAL INFORMATION

Ecotoxicity

No ecotoxicity data is available for the mixture. No known significant effects or critical hazards.

Persistence/degradability

Not available.

Mobility

Not available.

Environmental fate

Not available.

Bioaccumulation potential

Not bioaccumulative.

Environmental precautions

Prevent large amounts from entering waterways, drains and sewers.

13. DISPOSAL CONSIDERATIONS

Method of disposal

Product: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

Packaging: The generation of waste should be avoided or minimized wherever possible. Industrial Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

14. TRANSPORT INFORMATION

Not classified as dangerous goods for transport by sea (IMDG), air (IATA) or land in Australia (ADG Code).

15. REGULATORY INFORMATION

Poisons Schedule: Not a scheduled poison.

All significant ingredients in this formulation are compliant with AICS regulations.

16. OTHER INFORMATION

Revision date: 5 August 2025

Key:

ADG Australian Dangerous Goods Code for the transport of dangerous goods by road and rail.

AICS Australian Inventory of Chemical Substances.

CAS Chemical Abstract Service (registry number)

TWA time weighted average

UN United Nations.
