

Searles® GardenLime

SOIL SWEETENER & CONDITIONER

Searles Garden Lime helps correct acidity which assists in opening up the soil, produces a crumb-like structure and assists in the release of other plant nutrients which are unavailable under acid conditions.

- Soil sweetener & conditioner
- Raises soil pH
- Corrects soil acidity
- Adds essential Calcium
- Improves soil structure & humus formation
- Helps strengthen plants
- Increases nutrient availability.

Soil pH

Soil pH is the measure of soil acidity or alkalinity.

- 7 is neutral
- Less than 7 is acidic
- Greater than 7 is alkaline

When soil is too acidic (less than 5.5) nutrients become less available to plants and soil structure can harden.

OPTIMUM pH Range

Most plants grow well in pH 5.5 - 7.0. Acid loving plants (such as azaleas, camellias, gardenias, rhododendrons, some Australian native plants, philodendrons, ericas, junipers and spruce) prefer 5.0 - 6.0. Potting mixes and organic mixes perform better at slightly lower pH than soils.

To test your soil pH, use Searles pH Test Kit

Directions for use

Apply evenly over soil, where possible, mix into soil before planting.

Raising soil pH by approx. 1 pH unit.

SOIL TYPE	LIME PER SQUARE METRE
Sandy Soil	150 - 200g
Loam Soil	200 - 300g
Clay Soil	300 - 400g
Organic Soil	400 - 500g

DO NOT use on acid loving plants such as azalea, camellia, gardenia, magnolias, rhododendron, etc.

Searles®

GardenLime

SOIL SWEETENER & CONDITIONER

- Corrects soil acidity
- Raises soil pH
- Adds essential Calcium
