*Suitable for use
 in organic gardens*

Searles Natural Gypsum is a high quality natural Australian gypsum for use on lawns, flower & vegetable gardens, fruit trees & orchards, composts and garden soils.

Searles Natural Gypsum is ideal for improving and conditioning heavy clay soils. Searles Natural Gypsum improves the soil structure by breaking up hard soils and converting them into a friable and crumbly soil.

Regular use of Searles Natural Gypsum will improve soil aeration, drainage and water penetration, producing a productive and softer soil.

Searles Natural Gypsum is ideal for all soils and gardens as it does not alter the pH of the soil. Gypsum is also suitable for application with lime intolerant plants such as Azaleas, Camellias, Gardenias, Rhododendrons, Daphne, Ericas and Philodendrons.
