Zeolite

IMPROVES NUTRIENT DELIVERY

Zeolite is a natural mineral with a high CEC (Carbon exchange capacity) which provides excellent storage for essential nutrients, such as ammonium nitrogen and potassium.

By providing excellent nutrient storage, zeolite enhances fertiliser use in the soil by helping trap and store these important nutrients.

Zeolite improves soil health, increases nutrient & water storage in soils and composts, improving plant growth and health.

- Nutrient storage and delivery
- Water storage and infiltration
- Reduces nutrient leaching
- Conditions soil
- Improves plant health & growth
- 100% natural

Directions for use

 1 CUP (250ml) HOLDS APPROX. 250g ZEOLITE

GARDENS FRUIT, FLOWERS & VEGETABLES	Apply 1kg zeolite per square metre. Incorporate into soil to a depth of 15cm.
COMPOSTS	Apply zeolite in layers as mixing compost heaps. Zeolite helps to trap and store ammonium nitrogen, reducing odour and improving quality.
POTTING MIXES	Improve potting mix performance by adding zeolite at approx. 2.5% of mix volume. For a 30 Litre bag potting, add 750g zeolite.
LAWNS & TURF	Spread zeolite evenly over lawns at 250g per square metre.

Zeolite is best applied when preparing gardens so that it can be incorporated into the soil. Annual applications at any time of the year will help to improve soil and plant health.
