REWETTING GRANULES

DIRECTIONS FOR USE

Simply sprinkle it on, water and watch your plants grow. Suitable for application all year round.

POTS		HANGING BASKETS	
POT DIAMETER	APPLICATION	BASKET DIAMETER	APPLICATION
14cm 5½"	5g	25cm 10"	10g
20cm 8"	12g	30cm 12"	18g
25cm 10"	25g	35cm 14"	30g
30cm 12"	45g	40cm 16"	40g
50cm 20"	150g	50cm 20"	75g

GARDEN BEDS

Apply at the rate of 150g per square metre or mix into the soil prior to planting at the rate of 50g per plant.

NOTES: 1. Always water in well after each application. 2. Suitable for a wide range of Australian native plants & other proteaceous plants. For plants known to be very phosphorus sensitive, apply at half rate. 3. For very sensitive plants, apply at half rate.

Searles® Recharge® Fertiliser contains a scientifically designed unique combination of high performance ingredients for long term brilliant results.

Penetraide® starts the process by delivering water and nutrients into the root zone and overcomes common water repellancy problems in gardens for up to 12 months.

12 month long term feeding with Robust Controlled Release Fertiliser.

Special blend of select nutrients, trace elements & minerals for rapid response for lush foliage, flowering & rapid growth.

Addition of zeolite provides storage of nutrients for greater nutrient efficiency.

Contains Penetraide to reduce water repellancy problems and deliver water and nutrients into the root zone.
