

Searles®

ADVANCED Penetraide® RE-WETTING GRANULES

12 LASTS UP TO MONTHS

HELPS PREVENT WATER REPELLENT SOILS
Added fertiliser to boost response

FOR POTS, GARDENS & LAWNS

COVERS UP TO 90m²

4kg

12 LASTS UP TO MONTHS

Sometimes the harsh drying climate can make gardening more difficult by drying the soil and causing it to become water repellent, which may cause the plant to wilt and sometimes die.

Searles Advanced Penetraide® Re-wetting granules are remarkable granules which allow the water to penetrate to the plants roots where it is most needed which enhances the soils ability to absorb moisture, increasing plant growth. This mix also contains a slow release fertiliser which works in combination with the re-wetting granules for optimum plant growth.

Just sprinkle them around your pot plants, garden beds, shrubs, fruit trees, lawns and water will penetrate and be absorbed for up to 12 months, even after a complete dryout.

DIRECTIONS FOR USE

Sprinkle evenly onto soil, potting mixture or lawns & water as normal.

GARDEN BEDS, SHRUBS, TREES & LAWNS

- Apply at rate of 450g (1 1/2 cups) to 10 square metres.
- 4kg tub covers up to 90m²

POT PLANTS

POT SIZE	REQUIRED AMOUNT	APPROX. MEASUREMENT
