FRUIT FLY TRAP

ECO FRIENDLY RE-USABLE DEVICE

DIRECTIONS FOR USE FOR TRAP

1. Insert wick inside trap under lid (see directions below).
2. Hang complete trap in tree at least 1m above ground level.
3. Monitor trap for fly numbers as required.

Male fruit fly will be attracted from up to 500 metres away. To determine the source direction of male fruit flies hang traps around perimeter of orchard or area to be monitored. To determine the efficacy of the control program, place 1 to 2 traps in the centre of the orchard.

NOTE: If water ingress occurs, remove lid and empty any water trapped. If wick is wet, replace with a new wick.

- This trap contains 1 wick.
- Each wick lasts for 3 months.

Replace with Searles Fruit Fly Wick every 3 months.

WICK INSTALLATION/REPLACEMENT

step 1

Hold tab firmly at the top of lid with fingers.

step 2

Insert plastic rod into lid hole and turn to secure in place.

step 3

Turn rod 90° to remove for wick replacement.

FRUIT FLY TRAP

COMPLETE TRAP & WICK

MALE QUEENSLAND FRUIT FLY
(*Bactrocera (Dacus) tryoni*)
Fruit fly magnified.

The Queensland fruit fly (*Bactrocera tryoni*) is a wasp-like, red brown fly with yellow markings. Adult flies are about 5 to 8mm in length and cause fruit damage in orchards and home gardens throughout Australia.

They cause damage after mating by laying their eggs below the surface of the fruit and the larvae hatch then burrow into the fruit. They are most active during the warm humid months from September to April, although in some regions they are active all year round.

Searles Fruit Fly Trap is an excellent re-usable trap that contains a special wick to attract male fruit flies into the trap then subsequently kills them - **stopping the breeding cycle**. Searles Fruit Fly Traps are also great as a monitoring tool to see if fruit flies are in your area.

HANDY HINTS

- Prune trees and plants of unwanted branches.
- Pick fruit before it falls to the ground and remove any fallen fruit.
