HOW IT WORKS

Searles®

**ADVANCED
Penetraide®
RE-WETTING GRANULES**

**Gardens Shrubs & Trees
Lawns Pots & Baskets**

Sometimes the harsh drying climate can make gardening more difficult by drying the soil and causing it to become water repellent, which may cause the plant to wilt and sometimes die.

Searles Advanced Penetraide® Re-wetting granules are remarkable granules which allow the water to penetrate to the plants roots where it is most needed and enhances the soils ability to absorb moisture, increasing plant growth. This mix also contains a slow release fertiliser which works in combination with the re-wetting granules for optimum plant growth.

Just sprinkle them around your pot plants, garden beds, shrubs, fruit trees, lawns and water will penetrate and be absorbed for up to 12 months, even after a complete dryout.

DIRECTIONS FOR USE

Sprinkle evenly onto soil, potting mixture or lawns & water as normal.

GARDEN BEDS, SHRUBS, TREES & LAWNS

- Apply at rate of 450g (1 1/2 Cups) to 10 square metres.
- 7kg bag covers 150 square metres.

POT PLANTS

POT SIZE	REQUIRED AMOUNT	APPROX. MEASUREMENT
25cm (10")	12g	1 Level Tablespoon
30cm (12")	24g	2 Level Tablespoons
40cm (16")	36g	2 Heaped Tablespoons
50cm (20")	72g	4 Heaped Tablespoons

HANGING BASKETS

BASKET SIZE	REQUIRED AMOUNT	APPROX. MEASUREMENT
35cm (14")	15g	1 Heaped Tablespoon
45cm (18")	24g	2 Level Tablespoons
50cm (20")	36g	2 Heaped Tablespoons
60cm (24")	60g	4 Heaped Tablespoons

All application rates are suggested as a guide only. Rates may be varied according to the users conditions and applications.
